PROFESSIONAL SUMMARY

Full-stack developer and computer vision engineer with 4+ years of experience building web applications, backend services and applied computer vision solutions. Experienced in React, Next.js, Node.js, Python and MongoDB, with hands-on work in real-time face recognition, object detection, video analytics and role-based web platforms.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, WebSockets, JWT, role-based access control

Databases: MongoDB, Mongoose, MySQL

Computer Vision & ML: Python, OpenCV, YOLOv8, InsightFace, MediaPipe, PyTorch, scikit-learn, CNNs, KNN, object tracking

Tools & Practices: Git, GitHub, Docker, Linux, Postman, Vercel, Agile / Scrum, debugging, code review

PROFESSIONAL EXPERIENCE

Computer Vision Developer

Rahanet IT Company | Herat, Afghanistan | Nov 2024 – Sep 2025

- Developed computer vision features with Python, OpenCV and YOLO for surveillance, monitoring and analytics.
- Built face-recognition and object-detection pipelines for people and vehicle tracking in live video.
- Implemented automated people- and vehicle-counting reports, tuning processing for low-resource hardware.
- Connected vision modules to backend services and dashboards for reviewing alerts, screenshots and reports.

Web Developer

Wassa Company | Herat, Afghanistan | Oct 2023 – Jul 2024

- Built responsive web interfaces using HTML, CSS, JavaScript and React.
- Implemented backend functionality and integrated internal and third-party REST APIs.
- Improved page performance and accessibility through refactoring and reusable components.

MERN Stack Web Developer

Farsrout Company | Herat, Afghanistan | Feb 2022 – Aug 2023

- Developed full-stack applications using MongoDB, Express, React and Node.js.
- Designed REST APIs and implemented JWT authentication and role-based access control.
- Improved maintainability through refactoring, code reviews and reusable component patterns.

SELECTED PROJECTS

Real-Time Face Recognition Attendance System

Technologies: *Next.js, TypeScript, Python, FastAPI, InsightFace, OpenCV, MongoDB*

Connected live face recognition to an attendance dashboard with automated records and role-based management.

Intrusion Detection System

Technologies: *Python, YOLO, OpenCV, NumPy*

Detected and tracked movement in restricted zones and generated alerts with saved screenshots.

Learning Management System

Technologies: *Next.js, TypeScript, MongoDB, Node.js, Tailwind CSS, JWT*

Built role-specific dashboards and workflows for course creation, enrollment and progress.

Face Liveness Detection

Technologies: *Python, YOLOv8, PyTorch, OpenCV*

Developed a real-time workflow to distinguish live faces from photo- and screen-based spoof attempts.

Basketball Video Analysis

Technologies: *Python, YOLOv8, OpenCV*

Detected and tracked players and the ball in match footage, with movement trajectory visualization.

AI Interview Platform

Technologies: *Next.js, TypeScript, Node.js, MongoDB, AI APIs*

Built an interview practice workflow with AI-generated questions, feedback and user history.

Real-Time Face Anonymizer

Technologies: *Python, MediaPipe, OpenCV*

Detected faces in video and applied anonymization to protect identities.

EDUCATION

Bachelor of Science in Computer Science

Ghalib University | Herat, Afghanistan | 2020 – 2024

CERTIFICATION

MERN Stack Development Certification — Wassa Company, 2023

LANGUAGES

Persian (Native) | English (Professional working proficiency) | Arabic (Intermediate)
